

QUALITY MANAGEMENT ESSENTIALS (QME) MANAGEMENT SYSTEMS CERTIFICATION

Quality in all forms, from product manufacturing to customer service, under QME certification will improve a company's value, cost efficiency and customer relationship.

QME certification is granted to companies that demonstrate compliance and regulatory requirements with the ISO 9001 standard. PECB will provide you with this certification by demonstrating that your product or services meet the major criteria and is in conformance with ISO 9001. With this certification, which is a useful tool to add credibility, companies will show compliance to the specific clauses implemented in their management system, such as:

- Being aware of the context of the organization
- Proactively scanning their organization
- Being able to react to a crisis that occurs
- Communicating a positive message to staff and customers
- Ensuring management's support for the implementation
- Determine and maintain required infrastructure
- Planned and controlled processes
- Providing product and service related information
- Determine design stages considering activities such as verification and validation, control of design, design review, resources needed for design and development, etc.

What is QME about?

QME consists of the major clauses of ISO 9001, which allow different departments at a company to implement them with less direction from management and without risking the fundamental concepts of ISO 9001 structure. Implementing PECB's QME framework and obtaining the certification for your organization is the right decision towards demonstrating the ability of practicing quality management and addressing the challenges involved in an efficient way.

The design objectives for this new certification scheme:

- Easy implantation steps
- Committed to customer satisfaction
- Ensuring confidentiality and impartiality
- Reduced management involvement
- Certifiable

QME certification (also known as “registration”) is granted by a third-party, such as PECB, upon verifying through an audit that the organization has fulfilled the considered essential clauses. This certification is then maintained through scheduled annual surveillance audits by the registrar, with re-certification of the Quality Management Systems performed on a triannual basis.

Benefits of QME certification to your organization:

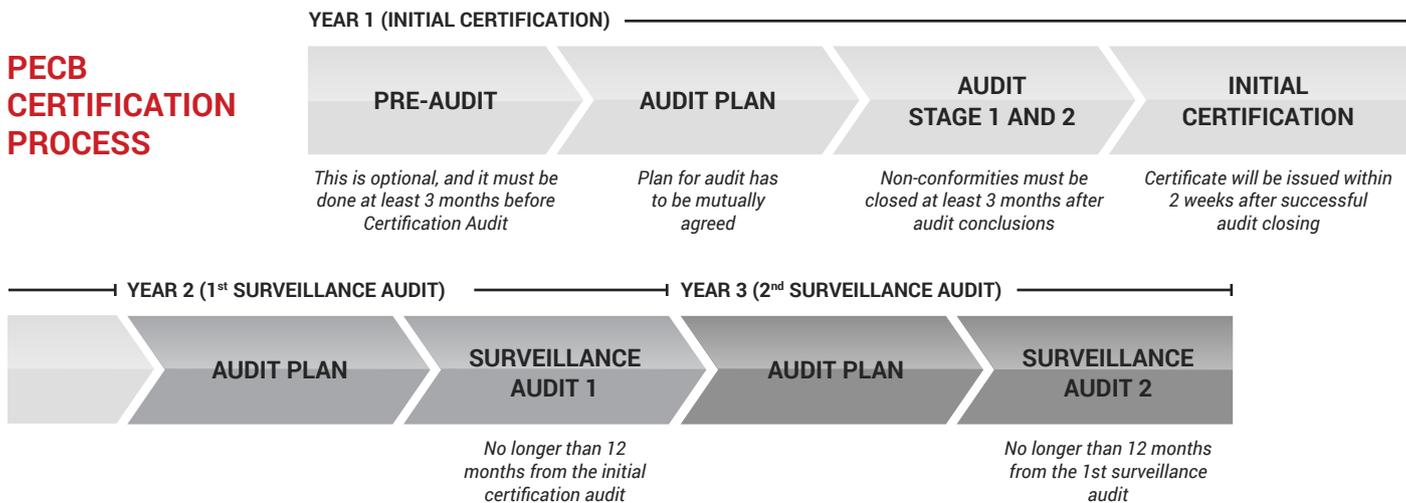

- Easy implantation steps
- Committed to customer satisfaction
- Ensuring confidentiality and impartiality
- Reduced management involvement
- Certifiable
- Benefits of QME certification
- Improve performance of affected processes
- Reduce implementation costs
- Does not require extra training for certified ISO 9001 implementers and auditors
- Identifies and encourages more efficient and time saving processes
- Marketing advantage through international recognition of the certificate
- Serves as a feasible stepping stone to achieve full ISO 9001 certification

PECB is a certification body for persons, management systems, and products on a wide range of international standards. As a global provider of training, examination, audit, and certification services, PECB offers its expertise on multiple fields, including but not limited to Quality Management.

We help organizations to show commitment and competence with internationally recognized standards by providing this assurance through the education, evaluation and certification against rigorous, internationally recognized competence requirements. With a global coverage of more than 900 partners in over 150 countries worldwide, our mission is to provide our clients comprehensive services that inspire trust, continual improvement, demonstrate recognition, and benefit society as a whole.
