

Become acquainted with the best practices of Quality Management Systems for petroleum, petrochemical and natural gas industries, sector-specific for product and service supply organizations based on ISO/TS 29001

Why should you attend?

ISO/TS 29001 Foundation training enables you to learn the basic elements to implement and manage a Quality Management System for petroleum, petrochemical and natural gas industries, sector-specific for product and service supply organizations as specified in ISO/TS 29001. During this training course, you will be able to understand the different modules of an OGQMS, including OGQMS policy, procedures, performance measurements, management commitment, internal audit, management review and continual improvement.

After completing this course, you can sit for the exam and apply for the "PECB Certified ISO/TS 29001 Foundation" credential. A PECB Foundation Certificate shows that you have understood the fundamental methodologies, requirements and management approach.

Who should attend?			Learning objectives
 Individuals involved in Quality Management for petroleum, petrochemical and natural gas industries, sector specific for product and service supply organizations Individuals seeking to gain knowledge about the main processes of OGQMS Individuals interested to pursue a career in OGQM 		× ×	Understand the elements and operations of a Quality Management System for petroleum, petrochemical and natural gas industries, sector-specific for product and service supply organizations Acknowledge the correlation between OGQMS and other standards and regulatory frameworks Understand the approaches, methods and techniques used for the implementation and management of an OGQMS
